MAN 4XXX

PR: ~~GEB 3031 and MAN 3025~~. Completion of the CBA Primary Core.

Computer-based quantitative decision models (including linear programming and extensions, queuing, network models, simulation) and decision support systems for business organizations.

Discussion with others: N/A

Rationale: This course will primarily serve as a Restricted Elective for undergraduate Management majors (9 hours are required), however, it will be open to any CBA undergraduate major. Since the catalog language indicates any MAN course will satisfy the Restricted Elective requirement, branding this course as a MAN course rather than a QMB course will remove a lot of confusion on the part of students, and will eliminate the need for audit corrections for Management students who have taken this course. Prerequisite language needs to be changed to reflect the new standards for admission to an undergraduate major (successful completion of the primary core).

The impetus to reduce the number of students in the department majors, increase their quality, increase the rigor of the courses, and increase the focus on data driven decision making has been the driving force behind this proposal. The course will cover a variety of rigorous decision support models from within the realm of mathematical programming (i.e., linear, integer, zero/one, and goal programming), dynamic programming, network models, queuing models, decision theory, and decision trees. It will examine the processes, methodologies, infrastructure, and current practices used to transform data from many sources into useful information for managerial decision making.

Editing II PR: Journalism major or Magazine Journalism minor, a minimum grade of "C" (2.0) in JOU 3201, and a minimum grade of "C" (2.0) in JOU 2100C. Practical aspects of editing.

Rationale: The journalism curriculum changed, eliminating specializations including the Editing track. Editing II went from being a required course in the Editing track to an elective to be offered only when we had faculty to teach it. At the same time the size of the Journalism faculty was reduced from seven full-time professors/instructors to five. We would like to retain this course and hope to be able to offer it again.
